Company Profile

Usha Shriram Private Limited is a multi-product company with focus on technology and innovation. USHA SHRIRAM is one of the most trusted brands in India.

Over the years we have diversified into various product lines such as Lighting, Cookware, Water & Air Purifiers, Furniture, Mattresses, Luggage, Fans & Appliances, Electrical Wires & Cables, Modular Switches, MCBs & Switchgear, Solar Panels & Batteries, Mobile Phones and many more .

USHA SHRIRAM is a name to reckon with for Quality, Reliability and Trust – a reputation that we have earned over the decades by building quality products, providing excellent service and customer satisfaction. We have an extensive facility for testing our products, where all the required tests by International and Indian standards can be conducted.

We have also been exporting to neighbouring countries and to many countries in the Middle East and Africa.

The strength of our talented and motivated workforce is the ability to grow, and to consistently exceed customer expectations. This has resulted in making USHA SHRIRAM a well known brand in India which enjoys phenomenal goodwill.

40 Years & Counting....

Usha Shriram has one of the largest ranges in cookware. These include Pressure Cookers, Pressure Handis, Non-stick cookware, Ceramic Coated Non Stick cookware, Hard Anodized cookware, Tri-ply cookware and Induction Base cookware. Our cookware product range is one of the finest and most comprehensive in the cookware industry. We've expanded upon existent technology, updated the designs and developed products for the next generation of cooking enthusiasts.

The cookware was developed to ensure that there would be a viable domestic cookware option for modern consumers who preferred quality products and did not consider cooking a chore. We take the time and care to make sure that every individual item of cookware delivers outstanding cooking performance, looks good, is easy to use and durable. With this dedication backing our singular designs, we give products that are central to shared experiences, strengthening relationships, building family feeling and creating memorable experiences and traditions around the table.

Hard Anodised Cookware

What is Hard Anodised Cookware?

Hard Anodising is an electrolysis process by which a layer is formed which becomes an integral part of the aluminium surface. Because of this process, the surface becomes harder than steel and attains non-toxic, non-reactive, non-corrosive and abrasion resistant properties. It heats quickly, evenly and retains more heat.

FEATURES :

- 1 - 2.4 times harder than steel.
- 2 - Non-toxic and non-staining.
- 3 - Non-reactive with foods.
- 4 - Not spoilt by high heat.
- 5 - Metal ladles can be used.
- 6 - Heats faster and evenly.
- 7 - Cooks food faster and crisper.
- 8 - Needs some oil to prevent sticking.

Non Stick Cookware

What is Non Stick Cookware?

A non-stick surface is a surface engineered to reduce the ability of other materials to stick to it. Usha Shriram uses 'EVERSLATE' - one of the best quality Non Stick coatings with Japanese technology. For low fat/oil cooking, non stick cookware is the most commonly used cookware all over the world.

Another special feature of our Non-stick cookware is that it has an Extra Thick Collar made using Forging Process. This give Enhanced Strength to the cookware.

FEATURES:

1. Non-stick cookware can be used for a variety of cooking.
2. Non-stick coating increases the quality of cooking by ensuring good flow of heat throughout the surface area.
3. Cleaning non-stick cookware is easier compared to conventional cookware.
4. Simply rinse with hot soapy water and sponge dry after each use.
5. Non-stick cookware requires minimum oil to cook, makes food healthier.
6. Our Non-stick coating uses patented multilayered technology to ensure superior performance and durability.

Ceramic Coated Non-Stick Cookware

What is Ceramic Coating ?

Ceramic coated cookware is made with an aluminium body, and sol-gel coating that is bonded onto the surface. Sol-gel is a silicone oil that is released when the pan is heated, mimicking nonstick properties, resulting in excellent food release. Ceramic provides a natural non-stick surface without the use of toxic chemicals in its production.

FEATURES :

- 1. No-Stick Coating** : The coating on the inside of a ceramic pot or pan functions similarly to that of non stick cookware, providing a frictionless surface for cooking. Ceramic cookware can be a solid option for those trying to cook with less fat, since you won't need as much oil or butter to keep food from sticking.
- 2. Easy to Clean** : Since food naturally releases more easily from the surface of a ceramic pot or pan, you won't need to scour or soak your ceramic cookware to get it clean. Just give it a gentle scrub with dish soap and a soft sponge to remove any debris. The only thing is to avoid abrasive tools like steel wool at all costs.
- 3. Induction-Compatible** : If you're looking for a pan that's compatible with an induction cooktop, ceramic cookware is a solid option that's typically compatible across all types of cooktops, from induction to gas to electric.

Pressure Cookers & Handis

What is Pressure Cooking?

Pressure Cooking is the process of cooking food, using water or other cooking liquid, in a sealed vessel - known as pressure cooker, which does not permit air or liquid to escape below a pre - set pressure. Pressure cookers are used for cooking food quicker than conventional cooking methods, which also saves energy.
